## SKILL

Fast Learner

Trustworthy

Responsible

Linux

Windows

Network

Virtualization

## LANGUAGE

Uzbek

● ● ● ● ●

English

● ● ○ ○ ○

## HOBBY

Reading And Self-Improvement ,Learning New Technologies And Useful Information

## PROFESSIONAL SUMMARY

Motivated cybersecurity learner with strong interest in ethical hacking and system administration. Seeking to grow practical experience in a professional environment.

## WORK EXPERIENCE

### Ethical Hacking & System Administration, Learning Experience

11/2024 - 9/2025

Security Lab Developer (Personal Project) — 2025 • Designed and built a MySQL database from scratch on Linux and intentionally configured multiple vulnerabilities for learning and testing purposes (SQL injection, weak authentication, misconfigured permissions). • Deployed and documented vulnerable web services that interact with the database to practice exploitation and mitigation techniques. • Used Docker and native Linux services to automate environment setup and restore snapshots for repeatable tests. • Wrote step-by-step documentation and proof-of-concept exploits to track findings and remediation steps. Windows Lab & Pivoting Practice (Personal Project) — 2025 • Built a multi-machine Windows lab including two machines (Windows 10 and Windows Server) to practice lateral movement and pivoting techniques. • Configured realistic network segmentation and services to simulate enterprise environment and attack paths. • Performed hands-on exercises for privilege escalation, SMB/NTLM attacks, and pivoting from a compromised Windows 10 host to Windows Server. • Documented attack chains, used remediation notes, and implemented defensive configurations to reduce attack surface.

## EDUCATION

### Pentesting & Sysadmin, Haad

Tashkent

11/2024 - 09/2025

Penetration Testing, System Administration, Ethical Hacking
